DECLARATION UNDER 37 C.F.R. §1.804

I, the undersigned Professor David Wallach, hereby declare and state as follows:

I am a full Professor in the Department of Biological Chemistry at the Weizmann Institute of Science in Rehovot, Israel.

I am an inventor of the above-identified patent application.

I have reviewed the declaration of Danny Suisa, which I understand as being filed in the above-identified application on even date herewith, and I have no reason to believe that any of the statements therein are inaccurate.

I hereby confirm that the hybridoma and antibody identification numbers used in the above-identified patent application and the U.S. applications from which the above-identified application claims benefit, and the Israeli priority applications from which the above-identified

application claims benefit, are the same numbers which were assigned to these hybridomas upon their original cloning in Danny Suisa's laboratory.

Thus, the hybridoma which was originally cloned and subsequently subcloned in Danny Suisa's laboratory and identified as monoclonal antibody 67 or hybridoma 67, is the same antibody and hybridoma clone or subclone as identified by the same number in every U.S. and foreign patent application relating to TBP-II of which I am a co-inventor or co-author.

The undersigned declares further that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
